

# Compost Converter

HOME COMPOSTING

The Compost Converter is the UK's best selling home composting container with more than 3 million units supplied. Easy and simple to use, the Converter is a great way of turning most kitchen and garden waste into a rich soil conditioner.

The push-fit windproof lid prevents the contents from blowing away and the wide aperture allows easy filling. The extra wide side hatch enables simple removal of the finished compost.

Available with an optional Base Plate which increases ventilation and drainage whilst restricting access by vermin.

Available in two sizes; the compact 220 and the large 330 litres. Composters are available in either green or black, both with black side hatch.

The Compost Converter has all the features to meet the Code for Sustainable Home Category WAS3, and obtain 1 point.

Made from recycled plastic and guaranteed for 5 years.

| Product           | Capacity (litres) | Overall Dimensions (mm) |
|-------------------|-------------------|-------------------------|
| Compost Converter | 220               | 740 (dia) x 900 (h)     |
| Compost Converter | 330               | 800 (dia) x 1000 (h)    |
