

# MacroBin<sup>®</sup> 16-24 Series

### MACROBIN FAMILY

The MacroBin 16-FV and 24-FV are fully-vented and made with nonporous, injection-molded plastic which reduces the risk of product damage from pests, bacteria, or pathogens. Durable, with smooth surfaces, these bins can stand up to heavy day-to-day use, season after season, yet they are gentle on your produce and workers.

The MacroBin 16-FV with shallower depth is perfect for tender fruits and vegetables.

#### Features

**Rounded corners and smooth surfaces** means fewer scuffs, abrasions, and cuts on your tender fruits. Risk of contamination is reduced because there are fewer places for unwanted particles to hide.

**Ventilation slots** facilitate the use of thermofogging, reduce heat absorption and cooling costs, and provide for quicker drying and degreening.

**FDA-approved materials** are certified safe for use with food products, eliminating many HACCP problems associated with wood bins.

**Splinter-resistant plastic** delivers reduced maintenance costs, fewer injuries to workers, and less damage to your product. Bin repairs are inexpensive with hot air welding.

**Lightweight construction** reduces shipping costs and makes MacroBins easier to move; the direct load corner posts and interlocking foot design make them safer to stack.

**Nonporous surfaces** won't absorb water or dehydrate your product like wood bins, and they provide a constant tare weight throughout their use.

**Easy-to-sanitize** MacroBins keep cleaning costs to a minimum. A high-pressure wash removes most debris; a nonabrasive brush can dislodge any remaining items.

## **MacroBin**<sup>®</sup> 16-24 Series

### Benefits of **Using MacroBins**

Increased productivity Lightweight MacroBins are easy to handle, move, and transport. The unique interlocking foot design makes them easy to align and stack.

Reduced cooling costs Hundreds of vents in the sides and base promote air flow, make the environment less conducive to pathogen growth, and help your products stay

Reduced bin repair costs MacroBins are virtually maintenance free; repairs are easy with hot air welding.

Better sanitation and reduced contamination Smooth, nonporous surfaces are easy to sanitize and won't trap debris, breed bacteria, or absorb chemicals like wood bins.

Improved pack out Rounded corners and smooth surfaces mean fewer scuffs, abrasions, and cuts on your product.

Improved traceability and bin security

Several identification methods including RFID tags and attractive foil embossing are available.
