

Bokashi Bin

KITCHEN
COMPOSTING

Takes all food waste
including meat, fish, dairy
and cooked foods

100% home composting

Available as single or double kit (double kit has the benefit of allowing you to continue composting when the first one is full as you can leave one to ferment while filling the second)

Bokashi is a dry mixture of bran and molasses infused with beneficial micro-organisms that suppress pathogens and stop your waste from putrefying or emitting foul odours.

After a few weeks your waste can be added to a conventional compost heap or bin, or dug straight into the ground. It also produces a liquid feed which is packed with beneficial microbes and can be diluted as a plant feed or poured down the drain to prevent algae build up and odours.

18ltr capacity

Twin pack includes 3-4 months supply of bokashi bran

Product	Capacity (litres)	Overall Dimensions (mm)
Kitchen Composter	18ltr	320 (w) x 260 (d) x 380 (h)
